Data Visualisation Exam
75 Minutes :: 75 Marks
17th February 2026, H105, at 3:35 PM

Note

a) No clarifications will be provided during the exam. Make suitable and justifiable assumptions if needed, and state them. Start the answer to each question on a separate page.

b) Allowed to bring one A4 handwritten help sheet.

c) *If **you do not know the answer for any question** – just state "Do not know" (and nothing else) and you will be given **five marks for this question**. If you do this for all questions you will get a total of 20 marks in the exam.*

Questions

1. [20 Marks] Think of a data set (show few representative rows (about 3-5 rows and columns)) and its data visualisation **that answers at least one question that a SQL select query (using select-from-where clauses) on the same data set cannot answer**. Explain your answer in at most five sentences.

2. [20 Marks] For a data set of your choice (show few representative rows and columns (about 3-5 rows and columns) and come up with a visualisation that has **at least two different marks and four different channels**. Explain your answer in at most five sentences.

3. [20 Marks] Many visualisations can be misleading (that is convey something that cannot be got from (or is in) original data set), show two visualisations (along with representative data set (3-5 rows and columns)) that are misleading. Explain your answer in at most five sentences.

4. [15 Marks] We have learnt rules of thumb. **Come up with a rule of thumb of your own (that is not in the rules of thumb we studied)**, illustrate your answer by a visualisation. Explain your answer in at most five sentences.

Read the question, think for a few minutes, and then answer.

Best of Luck
